

Anne Devereux-Mills shows women how change is possible, is more in our control than we think, and more important, gives us a place to start.

Her story is one of strength, renewal, and growth. As a single mom, a top executive for many years in New York’s competitive advertising scene, and a cancer survivor, she has seen many hard days. Through it, she began to realize what was missing from her life, how inspirational it could be, and even more, how extraordinary the impact could be for others.

Her mission is to share what she has learned: how to recognize one’s own strengths and skills and use them to help other women, creating a outward moving circle of positive change and in the process, simultaneously, empowering yourself. It all starts with very small actions that cascade over time.
